DESIGNER DOORS

The beauty of wood, **the durability of aluminium**

Welcome to the world of Designer Doors. They are something special and unlike anything that you have seen before. Our doors have the natural beauty of hardwood and all the strength and advantages of high-grade aluminium.

At first glance you will see they are designed using broad profiles and intricate mouldings to replicate the way craftsmen constructed doors of a past age. The deep textured wood grain finish is created using a unique paint process that is both durable and beautiful.

The excellent properties of aluminium ensures that your door won't warp or rot and will provide continuous use for many years. The hardened coating

means that there is no need for varnish or annual wood treatments. It's virtually maintenance free! The inherent strength of our doors and the patented interlocking structure of the profiles, make this door exceptionally solid and strong. In addition, as aluminium is one of the world's most sustainable materials, the door has high green credentials.

When you consider all the advantages of Designer Doors, they provide secure, sustainable and durable protection, creating an impressively beautiful entranceway to your home, designed and built to your requirements.

Open up and find out more...

A NEW AGE OF DOORS

Taking inspiration from the techniques that artisans employed of old and applying modern engineering principals, we have designed a door which is quite simply a masterpiece. It's solid, safe, beautiful, insulating, protective, durable, impressive and easy to look after. **Quite simply, everything that a door should be.**

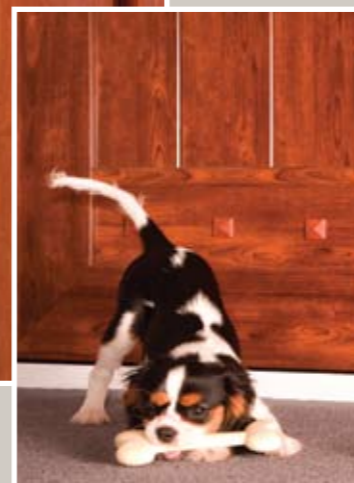

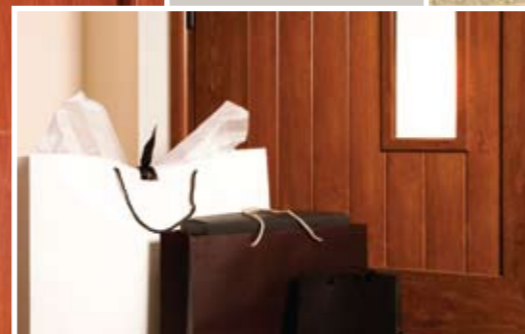

ALUMINIUM IS AN AMAZING MATERIAL...

With its high strength to weight ratio it provides a structure that is both lightweight and incredibly strong. It is completely recyclable and loses

none of its distinct properties ensuring consistently high quality in all uses.

BEAUTIFUL WOOD GRAIN

The finishing process that is applied to our doors is truly innovative and unique. The textured wood grain effect is a result of the fusion of two materials, which are applied separately and subjected to high temperatures within a kiln. The process ensures a consistent thickness, texture and exceptionally hard and luxurious finish. The application of this technique results in full colour throughout, even in those intricate, hidden areas on the door edge.

SOLID CONSTRUCTION

The design of our doors feature a simple but clever arrangement of interlocking, individual planks encapsulated within deep rebates. There are no glazing beads or trims to come adrift. As each piece locks together it combines to form the solid structure of the door.

SECURE

We have incorporated within the door a multi-point locking system and an advanced anti-tamper cylinder with dedicated secure coded keys. This door is designed to protect you, your family and your home.

ENERGY EFFICIENT

All sections of the door features a polyamide thermal break, which minimises heat transfer and reduces the cold from the outside, penetrating your home, which means when it's cold on the outside, it's warm on the inside.

EASY TO MAINTAIN

Apart from a wipe down with a soft damp cloth and the occasional lubrication of the lock, there is nothing else to do.

DESIGNER DOORS

FOUR WOOD GRAIN FINISHES:

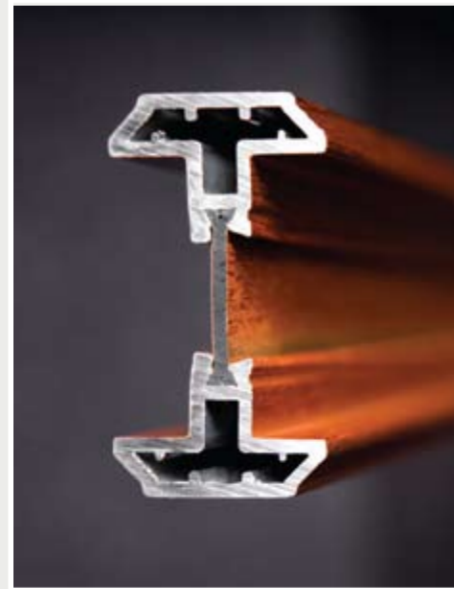

- 1 Dark Teak
 - 2 Golden Oak
 - 3 Antique Oak
 - 4 Cherry
- 26 DIFFERENT DESIGNS

Your beautiful made to measure door is available in 26 different designs, 4 wood grain finishes, and with a choice of luxury handles and latches. It will open and close easily day after day, year after year – never sticking when the weather's wet or shrinking when the weather's dry. It will protect you, your family and your home from the elements and from intruders. And, you don't need to protect it – because it's aluminium it won't rot, it won't rust and is virtually maintenance free.

STATE-OF-THE-ART SECURITY
All our locks include 'anti-bump' cylinders and high security multipoint locking, plus dedicated secure coded keys for your total peace of mind.

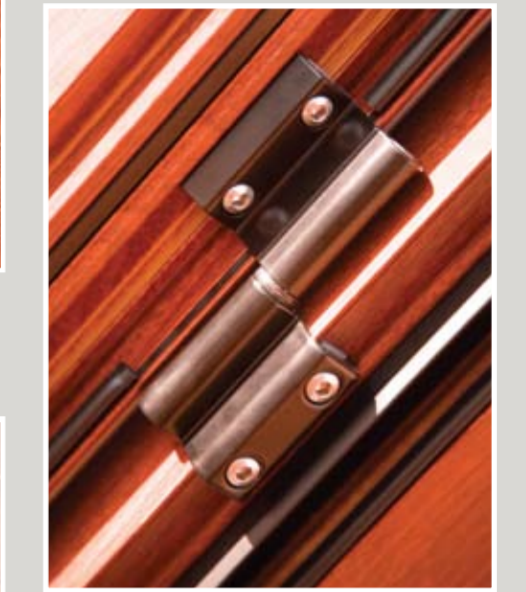

ENGINEERED FOR STRENGTH
The 'H-section' encapsulates the planks. There are no beads or moulding features to come loose (or be prised off), instead, every part of the construction is captive.

FORM AND FUNCTION
The planking system is solid, strong, and versatile. The planks securely interlock together and have polyamide thermal breaks to minimise heat transfer and save energy.

FEATURE DETAILS which are attractive and functional – there's no window dressing on this door – every part contributes to its strength. Our unique finishing process gives a natural wood grain effect with exceptional depth of colour. Choose from 4 colours – antique oak, golden oak, dark teak or cherry.

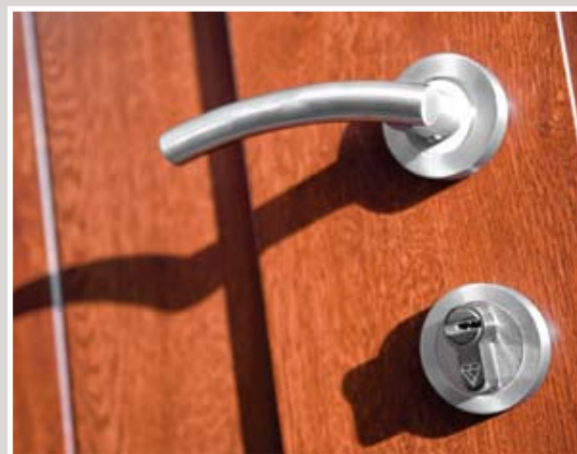

SECURE AND BEAUTIFUL, inside and out. The hinges are concealed within the door and are anti-lift, to enhance security. The wood grain finish covers all areas – even those you only see when the door is open.

UP, DOWN or sideways, the individual planks are available in four different widths and are attractively bevelled at the edges. They can be arranged horizontally, vertically, or diagonally – or a combination of all three directions.

LUXURY DOOR FURNITURE
Choose from our luxury range of handle and latch options, available in brass, chrome or satin stainless steel.

MODERN AND TRADITIONAL
Tailor every detail of your door, so it's exactly as you want it.

OUR RANGE OF DESIGNER **DOORS**:

- are made to measure to your specific sizes and requirements
 - have 4 authentic hardwood finishes
- come in 26 different styles ranging from contemporary to traditional
- include a wide choice of optional quality door furniture and fittings in brass, chrome and satin
