UNITHERM 55 PLUS

ARCHITECTURAL ALUMINIUM WINDOW SYSTEM

The Universal Unitherm 55 Plus window system offers a comprehensive arrangement of aluminium profiles that have been specifically designed to accommodate both the commercial and residential markets.

With greater insulation and increased thermal efficiency, the system is designed to include for inward and opening casement windows, as well as projected, tilt turn and fixed glazing.

The high performance system range features a variety of compact profile options to accommodate all types of building finishes, both internally and externally.

The system is generally internally glazed and can accommodate a double glazed unit of up to 40mm. All gaskets and weather seals are manufactured for EPDM.

The profile range also includes a variety of external projected cill options to suit most building design requirements.

The system is available in Dual Colour throughout the profile range, together with a range of anodised finishes.
